Lori,

We urgently need a summary of Brewster Kahle's invited talk at DAGS95. The phone number you gave Fillia Makedon earlier (see message below) does not seem to be in service at the moment.

We need to have at least an accurate page count by today, and the final text by tomorrow morning. If possible, we'd also like to get (by tomorrow) a position statement for the publishing panel Brewster is on. Unless you have a new version, we can take his biography for that straight from what he sent for the brochure.

Thanks for any help you can give -- for now we're assuming a 1-2 page statement from him (1 or 2 pp fit the same way the way our proceedings are formatted). If you can't supply anything, I'll use the paragraph biography from the brochure -- it's better than nothing.

P.S. If you'd still like to know about the three talks you mention, the titles are:

Peter J. Denning, The ACM Electronic Publishing Plan

Barbara Simons, Where Are We Going on the Information Superhighway:
Electronic Democracy or Electronic Tranquilizer?

Tim Berners-Lee, World Wide Web: The Consortium, and Plans for the
Future
